

# BUTCHER BAND SAW BLADES

Made of austrian steel.

# ORKAN

**set, sharpened, hardened (R O H)**

## CHARACTERISTIC

Band saw blades are produced with teeth grinding method.  
 It prolongs saw life, increase resistant for fatigue strength and microcracks.

## STANDARD TOOTH R O H S

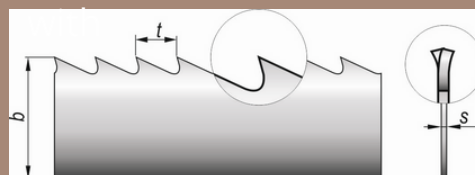

Tooth shape warrants high stability of cut, little waste of cut material.

Use:

- for cut and kind meat: frozen, unfrozen, bone and without bone,
- for fish cutting

b [mm]	s [mm]	pitch
16*	0,5*	6,35 (4 TPI)
16	0,56	6,35 (4 TPI)
19*	0,5*	8,46 (3 TPI)
19	0,56	8,46 (3TPI)

standard tooth (S)

## CLEANING TOOTH R O H W (variable pitch)

Special tooth shape (stability with cleaning tooth) makes easier cutting operation, warrants better retracting cut raw material, allows feed enlargement and reduction of cutting operation time.

Use:

- for any fresh meat

b [mm]	s [mm]	pitch
16*	0,5*	10
16	0,56	10
19*	0,5*	10
19	0,56	10

cleaning tooth (W)
