PalletCyclone is a specially designed bimetal band saw blade that allows you to effectively dismantle wooden pallets. Thanks to the appropriately selected tooth shape and pitch the **PalletCyclone** can easily cut both nails and wood used to build pallets. An additional advantage of this solution is a significant reduction of vibrations.

MATERIAL
M42

The teeth of the **PalletCyclone** band saw blade are made of high-speed steel M42, which ensures resistance to damage. The back band is made of a material that guarantees its flexibility and endurance against cracks. As a result, **PalletCyclone** offers high efficiency and a significant reduction in the costs of the pallet dismantling operation.

back band hardness	47 ÷ 52 HRC	

Bi-metal band structure

PalletCyclone saws are manufactured in our factory in Poland, which has been on the market since 1975. The raw materials we use for the production of saw blades come exclusively from renowned European producers (Germany, Austria). Restrictive factory control standards guarantee that the highest quality products leave our factory.
